Poitou-Charentes CREN's role

- The Conservatoire has the purpose of “the safeguard, the protection, the development and the study of landscapes of Poitou-Charentes who represent an ecological interest; floristic, faunistic, biological and geological too, for all sites with potential environmental values.
- Since 1993, it acts in a spirit of dialogue and scientific rigor, as a complement to environmental rules.

An office in each department and a specific landscape hub, most closely with territory's reality and actors.

The Conservatoire take part with the help of

La Région et l'Union européenne soutiennent le projet « Actions du CREN-PC pour la sauvegarde de la biodiversité » dans le cadre du « Programme Opérationnel FEDER/FSE 2014-2020 »

- Conservatoire's charter-

To know

Working in partnership with local actors for territory's arrangement and sustainable development. Uniting knowledge with scientists and technical expertise, to restore natural sites and preserve animal and vegetal species.

To protect

Poitou-Charentes is a region with diversified nature and landscapes. Fauna and flora are sometimes threaten to do by our evolution, desertion or transformation. To preserve our heritage is redesign the connection between humans and nature generally and locally, to act as a complement to environmental rules.

To manage

Meeting expectations as fully as possible territory's reality. Restoring environmental respectful activities, uniting all users and farmers to the safeguard of the flora and the fauna.

To promote

Introducing our biological and landscape heritage, alerting awareness among issues of landscapes management, because the nature is a wealth one needs to know to preserve it. Acting together and as soon as today for future generations.
